## VOLTAGE CONTROLLED OUTPUT MIXER

Four-channel master mixer for audio signals and control voltages with master-level control, channel on/off switches with status-LEDs as well as independent voltage controllable input volumes and panorama positions. Master volume control with dual stereo headphone outputs (switchable pre/post master control). Switchable 440 Hz tuning aid.

Voltage ranges 0–10 volts, panorama control (set at center position) needs  $-5/+5$  for full left/right range. The module is DC-coupled (except headphone outputs) to use it e.g. as a quad input/dual output mixer for control voltages. DC coupling can be defeated via jumpers on the PCB. Two vintage style VU meters display the L/R master levels.
